

Diagnostic Tools

on globalEDGE

Diagnostic Tools - Extreme Value!

The interactive diagnostic tools are based on 20 years of international business operations, empirical research findings, and the experience of industry professionals.

CORE [*Company Readiness to Export*] will allow you to determine your company's readiness to expand its operations internationally and ascertain its ability to export a particular product.

Partner [*International Partner Selection*] is a tool that will assist you in evaluating and comparing a variety of potential international venture partners.

Distributor [*Foreign Distributor Selection*] is designed to aid your company in identifying the best distributor or agent to use (specific to your product and market characteristics) when moving into new markets.

Freight [*International Freight Forwarder Selection*] evaluates the compatibility of international freight forwarders with respect to your business type and shipping volume.

GLOBE [*Globalization Benchmark*] assesses the degree of globalization potential of your organization based on the business structure, leadership, culture, management processes, strategy, and information technology.
